

# Introduction to **EBSCOhost 2.0**

Tutorial

The screenshot displays the EBSCOhost 2.0 search interface. At the top, a blue navigation bar contains links for [Keyword](#), [Subjects](#), [Publications](#), [Images](#), and [More](#). On the right side of this bar are links for [Sign In to My EBSCOhost](#), [Ask-A-Librarian](#), [New Features!](#), and [Help](#). The main content area features the EBSCOHOST logo on the left. To its right, the text "Searching: Academic Search Complete, Business Source Complete, ..." is displayed, followed by a link to [Choose Databases >](#). Below this is a search input field, a [Search](#) button, a [Clear](#) button, and a help icon. Underneath the search field are links for [Search Options](#), [Visual Search](#), [Advanced Search](#), and [Preferences >](#). At the bottom of the page, there are links for [EBSCO Support Site](#), [Privacy Policy](#), [Terms of Use](#), and [Copyright](#). Below these links is the copyright notice "© EBSCO Industries, Inc. All rights reserved." and a green footer bar with the [EBSCO Publishing Green Initiatives](#) logo and text.

Welcome to EBSCO's introduction to the new EBSCOhost 2.0 interface. In this tutorial, we will look at the new EBSCOhost searching interface as well as new features being implemented with this release including: new search modes, article and image preview via mouseover, the new result list and the enhanced preferences options.

EBSCO Publishing Green Initiatives

When logging into the new EBSCOhost interface, you will first notice a new, cleaner Basic search screen. Also, you will now find the authority files (**Subjects, Publications, Images, Cited References**) at the top of the EBSCOhost screen. As with the old interface, you can click on these items to search individual publications, thesauri, image collections, etc. If at any time during your session you wish to return to the basic search screen, simply click the EBSCOhost icon next to the **Find** field. You can add or change databases being searched by clicking the **Choose Databases** link above the **Find** field.

**SmartText Searching** is a new feature that allows you to enter a large piece of text or an entire page. Using a sophisticated algorithm, SmartText searching examines the text and places a weight on the search terms and returns a result list based on relevancy. Note the expanded **Find** field which accommodates more text.

The screenshot displays the EBSCO search interface. At the top, there's a navigation bar with links like 'Keyword', 'Subjects', 'Publications', 'Images', and 'More'. Below this, a search bar contains the text 'global warming'. To the left of the search results, there's a sidebar titled 'Narrow your results' which includes sections for 'Source Type' (listing various publication types like Academic Journals, Magazines, etc.) and 'Thesaurus Term' (listing environmental terms like ENVIRONMENTAL aspects, Climatology, etc.). The main search results area shows 'All Results: 1-10 of 6223' and lists three results. To the right of the results, there's a 'Limit your results' section with checkboxes for 'Full Text' and 'Scholarly (Peer-Reviewed) Journals', and a 'Date Published' slider bar. Below this is a 'Related Information' section with 'Related Images' and 'Related Videos'. Red circles highlight the 'Narrow your results' sidebar, the 'Limit your results' section, and the 'Date Published' slider bar.

For now, let's do a basic search for the term "global warming." Enter the search term in the **Find** field and click **Search**. You will see the new result list displayed. Notice the subject clusters to the left of the result list. On the right, you will find options to **Limit your Results** as well as **Related Information**. You can limit your results to full text, Academic (Peer-Reviewed) Journals or use the date slider bar to change the date range of your results. Once you have selected your limiter(s), click **Update**.

Results for: global warming

1. Out of Sync  The article considers the potential effects of global warming on the schedule of pollination. Flowering plants provide food to their animal visitors in exchange for pollination. Jane Memmott of the University of Bristol in England and three colleagues used the 1929 book, "Flowers and Insects," to study pollination. Its author, Charles Robertson, catalogued nearly 15,000 associations between 429 plant species and their 1,420 pollinators. On the basis of timing shifts caused by global warming that have already been observed in several plants and pollinators, Memmott and her colleagues figured that by the end of this century the annual activities of plants and pollinators will advance by one to three weeks.
